Editec Installs Europe's Largest Fleet Of I-MOVIX SprintCam Ultra-Slow Motion Systems

UK broadcast production and hire specialist Editec has placed additional orders for multiple I-MOVIX SprintCam ultra-slow motion systems, making Editec's SprintCam fleet the largest in Europe.

Editec has supplied SprintCam systems to broadcasters in the UK, since the product line was launched in 2008, working with key players on ultra-slow motion coverage of events in the UK and Europe including darts, Formula 1 racing, Hickstead show jumping, boxing, Premier League football, the Heineken Cup and international rugby, Cartier Polo Finals, and the Red Bull Air Race.

Steve Cotterill, Managing Director of Editec, said: "Since taking delivery of our first SprintCam systems in 2008, we've used them in a wide range of conditions and for events as varied as equestrian sports, athletics, speedway and hip-hop dancing - all with great success. This latest order is a response to sharply rising demand as broadcasters have seen what SprintCam is capable of. Technically, the system has performed well - it is truly a 'plug and play' device. Tally and full talkback facilities and dual outputs (live/replay) enable the camera to be used live at any time, and a senior vision engineer was recently heard stating: "This is the best picture quality I have ever seen from a high-speed camera".

SprintCam systems are renowned for their outstanding quality, performance, and usability in live broadcasting, delivering an unprecedented level of convenience and creativity in ultra-slow-motion action. The latest addition to the SprintCam range, the Phantom-powered SprintCam Vvs HD, raises the industry ultra-slow-motion performance bar yet again by operating at frame rates up to 2,700 fps in 1080i50 or up to 5,800 fps in 720p60 (more than 200 times slower than live action), with instant replay at native HD resolution and image quality.

Laurent Renard, CEO, I-MOVIX, said: "As one of the early adopters of the SprintCam system, Editec has played a key role in developing the UK market for ultra-slow motion, and the company has been instrumental in helping UK broadcasters stay at the forefront of this creative new way of presenting sports and other fast-moving action."

Editec offers the SprintCam system in the UK with full hire and support service.
