

TVEurope's Best of IBC2011 Editors' Awards

26 September 2011

Story Code : cs63

TVBEUROPE ☆ Editors' Awards Best of IBC 2011

With 13 halls and more than 1,300 exhibitors, IBC2011 was the largest ever, with lots of new products on show. Noticeable trends were the proliferation of iPads, whether as control devices or ways for viewers to access more content, many more high-speed cameras, and the spread of 3D throughout the production chain to the extent that most new 3D products were evolutionary rather than revolutionary.

Our combined *TVBEurope* and *IBC Daily* personnel give us by far the largest editorial team on the ground at IBC each year. Our editors really know the European market, and our *Best of IBC* selections are thus the smartest, most game-changing new products to be launched into the EAME market at the show.

All of our editors and writers make their selections at the show and then the list is stress-tested by Associate Editor David Fox who visits each candidate's stand to ensure they are valid and genuine. We firmly believe that *TVBEurope's Best of IBC2011 Editors' Awards* are the most meaningful, unbiased, relevant and market-focused selection in the industry!
