I-MOVIX is a Belgian company with market-leading technology in the domain of extreme slow motion

(18/11/2011) I-MOVIX is pleased to announce the launching of the SprintCam users forum, which is meant to be a friendly meeting place for those involved in ultra motion and an idea generation platform for new developments.

Indeed, the SprintCam forum has been implemented to help users throughout the world to get the most of the ultra motion systems developed by I-MOVIX by sharing their experiences and feedbacks with each other.

It is also the opportunity for those who are at the front line of sports and entertainment broadcasting to participate in the development of improved or totally new SprintCam products.

Join the SprintCam community by registering for this forum: <http://sprintcamusers.com>

### About I-MOVIX

I-MOVIX is a Belgian company with market-leading technology in the domain of extreme slow motion (from 150 to 10,000 fps). The company's products are the first true full-broadcast integration solutions for ultra slow motion, offering the unprecedented combination of very high frame rates and instant replay. The technology has applications in live sports and other live TV productions, as well as in commercials, documentaries, feature films, and scientific R&D. The company is headquartered in Europe, with a growing global network of distributor partnerships.
